

4G ANTENNA SHOP INC.

Immediate notice of Rate Plan modification for AT&T services.

Effective: August 23, 2020

Affected: All Clients with an AT&T assigned sim card issued before 08/01/2020.

Summary:

The 4G Antenna Shop Inc., has taken action to ensure compliance with the common carriers request regarding the usage allotments with the current data offerings previously available.

This action has been taken due to the corporation having to renegotiate contract terms and pricing with the major common carriers. The new pricing schedule has produced new rates which are one hundred percent higher than its predecessor and is in effective as of August 1st, 2020.

We have decided in best practices of the corporation that the current business model can no longer be supported at a reasonable rate and as such we will no longer offer any services under the previous usage or rate terms.

All clients on any previous model of AT&T business rate plans will be immediately transferred to our **Advantage 100 Rate Plan** (Plan Details can be found online at <https://4gantennashop.com/infinite-business/>), however please review rate plan requirements carefully as they may have a severe impact on how you use the internet.

We encourage you to take immediate safe harbor and review your options carefully. If you have no alternative solution for your data needs, please contact our customer care center for any available alternate options. Our team will provide you with new pricing, alternate plan options and compliance requirements based on our newer contracts with the common carriers.

Thank you for your understanding, please accept my sincerest apologies ahead of time as we know the difficulty and complexity of this situation. I wish there were more I could do to make this process easier; I am trying new negotiations every day and I am committed to getting the best results possible for everyone involved.

This notice supersedes all previous rate plan provisions and terms.

Sincerely,

Robert Villanueva
Director
